Claudia Alvarez is a divisive person more interested in advancing her political career than in community service. She is running against two experienced incumbents who have proven their value to the students, parents, faculty and administration of the community colleges in the Rancho Santiago Community College District. If she wants to serve the community, tell her to find another way that doesn't include elected office. There are plenty of organizations in Orange County where she can devote her time, that won't waste taxpayer dollars.
