

CITY CLERK'S OFFICE OF RECORDS AND INFORMATION

---

One Civic Center Plaza, P.O. Box 19575, Irvine, CA 92623-9575

June 11, 2015

Mr. Dan Chmielewski  
The Liberal OC  
[dchm@cox.net](mailto:dchm@cox.net)

Dear Mr. Chmielewski:

The attached information responds to your June 3, 2015 request under the California Public Records Act (Government Code § 6250 et seq.). Please find the responses below provided by the City Manager's Office.

The request is for:

1. "I am requesting a list of all the addressees who received the attached letter from Christina Shea."

**Response:** Per Council Services, the letter was sent to the petitioners listed in the Public Comments section of the April 14, 2015 City Council Meeting. Attached please find the Public Comments from the April 14, 2015 City Council Meeting.

2. "I am also asking for copies of all letters, memos, emails and meeting notes of any communication between Ms. Shea and Supervisor Todd Spitzer on the Veteran's Cemetery and Memorial from September 1, 2014 through June 30, 2015."

**Response:** The City has not located any records responsive to this request.

Sincerely,

Debbie Tracy  
Municipal Records Administrator

**Petition to Relocate the State Veterans Cemetery from  
the OC Great Park**

Irvine Residents Alliance for Great Park  
P. O. Box 14834  
Irvine, CA 92623-4834

David Gerard, Asst. Deputy Secretary  
Keith Boylan, Deputy Secretary  
Debbie Endsley, Acting Secretary  
California Dept. of Veterans Affairs  
PO BOX 942895, Sacramento, CA 94295

Submitted by  
Gang Chen,  
Public Comments  
April 14, 2015

Dear Secretary Debbie Ensley et al,

We are a group of residents in the City of Irvine, California. We are writing you to express our opposition of the State Veterans Cemetery in Orange County Great Park. We strongly urge you to reconsider the selection referenced in **AB1453**. Other more suitable locations in OC shall be considered.

With all due respect to OC Veterans, we do support an OC veteran cemetery to be built at a suitable site. Veterans fight for this country and our freedom and they certainly deserve a cemetery in OC. We hope the OC veterans' cemetery can demonstrate a good example of the respect of human rights and cultural tolerance on which this country is built and prospers, and for which veterans have been fighting.

However, we are questioning the compatibility, feasibility, and its underlying politic motivations to choose this cemetery site. It is insensitive for municipals to overlook the likely negative impacts of the site on its nearby residents. These likely impacts will be profound and lasting to Irvine economic future, Irvine residents' psychological comfort, and Irvine community's multicultural health. The cultural impact cannot be underestimated. It can spread into many other areas such as local economic and community development.

When this Bill was passed in July, 2014, public notification was certainly lacking if there was any. As a result, most residents in the area did not know anything about it. We are really questioning whether the process was truthfully and honestly conducted with considerations to reach out to the affected residents.

We urge you to consider to:

- Immediately stop any application and funding processes for the design and construction of this cemetery until a thorough communication with local communities is conducted and an acceptable agreement by all parties is reached.
- Set up committee to search for a suitable alternative site for the State Veterans Cemetery in the Orange County. We would love to help you in this search in many possible ways since we do want our veterans to have a good place to rest in peace.

**We have collected over one thousand residents' signatures. Attached is one sample page. We reserve all our legal rights to make sure our voice being heard and our rights being protected.**

Petition to Relocate the State Veterans Cemetery from  
the OC Great Park

Sincerely,

Irvine Residents Alliance for Great Park

Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park

To Whom It May Concern,

I am writing to you as a concerned resident of city of Irvine regarding the proposed location of State Veterans Cemetery in Orange County Great Park. Many of us are strongly against the location, and we urge you to reconsider the choice of this site for the Veterans Cemetery.

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

**Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park**

To Whom It May Concern,

I am writing to you as a concerned resident of city of Irvine regarding the proposed location of State Veterans Cemetery in Orange County Great Park. Many of us are strongly against the location, and we urge you to reconsider the choice of this site for the Veterans Cemetery.

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

**Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park**

To Whom It May Concern,

I am writing to you as a concerned resident of city of Irvine regarding the proposed location of State Veterans Cemetery in Orange County Great Park. Many of us are strongly against the location, and we urge you to reconsider the choice of this site for the Veterans Cemetery.

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. # Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park

To Whom It May Concern,

I am writing to you to petition for the relocation of the proposed State Veterans Cemetery from the OC Great Park and Irvine.

With all due respects to veterans, we do support any and all necessary and *suitable* veteran cemetery sites. However, the current location of the proposed State Veterans Cemetery is definitely wrong:

1. The cemetery is in the center of a highly populated city, neighboring to residential area, and adjacent to a future high school.
2. Irvine is a highly populated and diverse city with about 40% of the population as Asians, and this cemetery site is located very close to the urban center. Most of the residents lived next to the cemetery are Asians. In Asian culture, it is a taboo to place cemetery next to homes or close to urban area
3. Many Irvine residents did not know about this cemetery until October, 2014. We feel **shocked** about the proposed cemetery and **blindsided**.
4. In the next 100 years, the development of the west Coast of the United States will be largely supported by the Asian investment and immigrants. The cemetery in the Great Park will scare away the Asian investment and immigrants and make the portion of the Great Park into a ghost town, will make Irvine lose its competitive edge with other cities, and can be a turning point to start the decline of the city of Irvine.
5. The cemetery will drive down home values and increase blight. It's near a family area and was never proposed to the residents during any prior discussions or meetings about the great park.

Sincerely,

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

# Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park

To Whom It May Concern,

I am writing to you to petition for the relocation of the proposed State Veterans Cemetery from the OC Great Park and Irvine.

With all due respects to veterans, we do support any and all necessary and suitable veteran cemetery sites. However, the current location of the proposed State Veterans Cemetery is definitely wrong:

1. The cemetery is in the center of a highly populated city, neighboring to residential area, and adjacent to a future high school.
2. Irvine is a highly populated and diverse city with about 40% of the population as Asians, and this cemetery site is located very close to the urban center. Most of the residents lived next to the cemetery are Asians. In Asian culture, it is a taboo to place cemetery next to homes or close to urban area
3. Many Irvine residents did not know about this cemetery until October, 2014. We feel **shocked** about the proposed cemetery and **blindsided**.
4. In the next 100 years, the development of the west Coast of the United States will be largely supported by the Asian investment and immigrants. The cemetery in the Great Park will scare away the Asian investment and immigrants and make the portion of the Great Park into a ghost town, will make Irvine lose its competitive edge with other cities, and can be a turning point to start the decline of the city of Irvine.
5. The cemetery will drive down home values and increase blight. It's near a family area and was never proposed to the residents during any prior discussions or meetings about the great park.

Sincerely,

I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

**Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park**

To Whom It May Concern,

I am writing to you as a concerned resident of city of Irvine regarding the proposed location of State Veterans Cemetery in Orange County Great Park. Many of us are strongly against the location, and we urge you to reconsider the choice of this site for the Veterans Cemetery.

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. # Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park

To Whom It May Concern,

I am writing to you to petition for the relocation of the proposed State Veterans Cemetery from the OC Great Park and Irvine.

With all due respects to veterans, we do support any and all necessary and *suitable* veteran cemetery sites. However, the current location of the proposed State Veterans Cemetery is definitely wrong:

1. The cemetery is in the center of a highly populated city, neighboring to residential area, and adjacent to a future high school.
2. Irvine is a highly populated and diverse city with about 40% of the population as Asians, and this cemetery site is located very close to the urban center. Most of the residents lived next to the cemetery are Asians. In Asian culture, it is a taboo to place cemetery next to homes or close to urban area
3. Many Irvine residents did not know about this cemetery until October, 2014. We feel **shocked** about the proposed cemetery and **blindsided**.
4. In the next 100 years, the development of the west Coast of the United States will be largely supported by the Asian investment and immigrants. The cemetery in the Great Park will scare away the Asian investment and immigrants and make the portion of the Great Park into a ghost town, will make Irvine lose its competitive edge with other cities, and can be a turning point to start the decline of the city of Irvine.
5. The cemetery will drive down home values and increase blight. It's near a family area and was never proposed to the residents during any prior discussions or meetings about the great park.

Sincerely,

Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park

To Whom It May Concern,

I am writing to you as a concerned resident of city of Irvine regarding the proposed location of State Veterans Cemetery in Orange County Great Park. Many of us are strongly against the location, and we urge you to reconsider the choice of this site for the Veterans Cemetery.

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

To Whom It May Concern,

I am writing to you to petition for the relocation of the proposed State Veterans Cemetery from the OC Great Park and Irvine.

With all due respects to veterans, we do support any and all necessary and suitable veteran cemetery sites. However, the current location of the proposed State Veterans Cemetery is definitely wrong:

1. The cemetery is in the center of a highly populated city, neighboring to residential area, and adjacent to a future high school.
2. Irvine is a highly populated and diverse city with about 40% of the population as Asians, and this cemetery site is located very close to the urban center. Most of the residents lived next to the cemetery are Asians. In Asian culture, it is a taboo to place cemetery next to homes or close to urban area
3. Many Irvine residents did not know about this cemetery until October, 2014. We feel **shocked** about the proposed cemetery and **blindsided**.
4. In the next 100 years, the development of the west Coast of the United States will be largely supported by the Asian investment and immigrants. The cemetery in the Great Park will scare away the Asian investment and immigrants and make the portion of the Great Park into a ghost town, will make Irvine lose its competitive edge with other cities, and can be a turning point to start the decline of the city of Irvine.
5. The cemetery will drive down home values and increase blight. It's near a family area and was never proposed to the residents during any prior discussions or meetings about the great park.

Sincerely,

**Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park**

To Whom It May Concern,

I am writing to you as a concerned resident of city of Irvine regarding the proposed location of State Veterans Cemetery in Orange County Great Park. Many of us are strongly against the location, and we urge you to reconsider the choice of this site for the Veterans Cemetery.

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

**Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park**

To Whom It May Concern,

I am writing to you as a concerned resident of city of Irvine regarding the proposed location of State Veterans Cemetery in Orange County Great Park. Many of us are strongly against the location, and we urge you to reconsider the choice of this site for the Veterans Cemetery.

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park

To Whom It May Concern,

I am writing to you as a concerned resident of city of Irvine regarding the proposed location of State Veterans Cemetery in Orange County Great Park. Many of us are strongly against the location, and we urge you to reconsider the choice of this site for the Veterans Cemetery.

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. # Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park

To Whom It May Concern,

I am writing to you to petition for the relocation of the proposed State Veterans Cemetery from the OC Great Park and Irvine.

With all due respects to veterans, we do support any and all necessary and suitable veteran cemetery sites. However, the current location of the proposed State Veterans Cemetery is definitely wrong:

1. The cemetery is in the center of a highly populated city, neighboring to residential area, and adjacent to a future high school.
2. Irvine is a highly populated and diverse city with residents of various cultural beliefs, and this cemetery site is located very close to the urban center. Most of the residents lived next to the cemetery consider it a taboo to place cemetery next to homes or close to urban area
3. Many Irvine residents did not know about this cemetery until October, 2014. We feel **shocked** about the proposed cemetery and **blindsided**.
4. The cemetery in the Great Park will scare away investment and immigrants and make the portion of the Great Park into a ghost town, will make Irvine lose its competitive edge with other cities, and can be a turning point to start the decline of the city of Irvine.
5. The cemetery will drive down home values and increase blight. It's near a family area and was never proposed to the residents during any prior discussions or meetings about the great park.

A cemetery is a cemetery. Most Irvine residents do not like the current location of the cemetery because it is at a wrong location, too close to homes, a high school, and the urban center, and at a highly populated area. We are willing to help the veterans to find a better location to create a win-win situation.

"Never doubt that a small group of thoughtful committed citizens can change the world: Indeed it's the only thing that ever has."

- Margaret Mead- American anthropologist

There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

**Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park**

To Whom It May Concern,

I am writing to you as a concerned resident of city of Irvine regarding the proposed location of State Veterans Cemetery in Orange County Great Park. Many of us are strongly against the location, and we urge you to reconsider the choice of this site for the Veterans Cemetery.

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. I'm also quite upset that there was very little communication to the neighborhood community regarding the proposed cemetery. How can the city at the time pass a proposal like this without informing and consulting the residents first? A lot of us purchased the homes with no disclosure information about the proposed cemetery. We feel our rights and wishes are neglected to say the least.

While I deeply respect our veterans and what they have done for our country it is clear to me that there are quite a few alternative sites that are far more suitable for their cemetery. They deserve a quieter and more serene place to rest in peace. The current proposed location at Great Park is simply not suitable, and it will negatively impact the diversified community and economic growth of the area. We once again urge you to stop moving forward with this proposed site and start to look for a new alternative site for our Veterans.

Sincerely,

Petition to Relocate the Proposed State Veterans Cemetery from the OC Great Park

To Whom It May Concern,

I am writing to you as a concerned resident of city of Irvine regarding the proposed location of State Veterans Cemetery in Orange County Great Park. Many of us are strongly against the location, and we urge you to reconsider the choice of this site for the Veterans Cemetery.

The proposed location in Orange County Great Park is in the center of a densely populated residential area. There have already been many new homes built in the neighborhood and developer FivePoints Communities is set to build nearly 10,000 new homes around the park. In addition, there is a new high school under construction with clear sight of the cemetery where parents will drive by multiple times each day to pick up and drop off their kids at school. There will also be a new elementary and junior high school. It is our cultural belief that a cemetery and residences/schools should not be next to each other. I can foresee our lives would be negatively affected should a cemetery be built there. I may be forced to move because I don't want my kids to go to a school where they could see cemetery and funerals all the time.

Well over 40% of all home buyers in Irvine today are Asian. With their focus on high academic achievement it has made IUSD one of the most sought after school district, turning Irvine into one of the most highly valued cities for home buyers. Just like many others, I have put down my life savings to purchase a home here for our kids to have better education. Now, many will not consider buying a house within 5 miles of a cemetery due to its negative energy. As quoted in LA Times, Simona Mainini, a fengshui master, having a cemetery in the park could definitely lead to an "exponential" drop in property value. # Petition to Relocate the State Veterans Cemetery from the OC Great Park

David Gerard, Asst. Deputy Secretary  
Keith Boylan, Deputy Secretary  
Debbie Endsley, Acting Secretary  
California Dept. of Veterans Affairs  
PO BOX 942895, Sacramento, CA 94295

Dear Secretary Debbie Ensley et al,

We are a group of residents in the City of Irvine, California. We are writing you to express our opposition of the State Veterans Cemetery in Orange County Great Park. We strongly urge you to reconsider the selection referenced in **AB1453**. Other more suitable locations in OC shall be considered.

With all due respect to OC Veterans, we do support an OC veteran cemetery to be built at a suitable site. Veterans fight for this country and our freedom and they certainly deserve a cemetery in OC. We hope the OC veterans' cemetery can demonstrate a good example of the respect of human rights and cultural tolerance on which this country is built and prospers, and for which veterans have been fighting.

However, we are questioning the compatibility, feasibility, and its underlying politic motivations to choose this cemetery site. It is insensitive for municipals to overlook the likely negative impacts of the site on its nearby residents. These likely impacts will be profound and lasting to Irvine economic future, Irvine residents' psychological comfort, and Irvine community's multicultural health. The cultural impact cannot be underestimated. It can spread into many other areas such as local economic and community development.

When this Bill was passed in July, 2014, public notification was certainly lacking if there was any. As a result, most residents in the area did not know anything about it. We are really questioning whether the process was truthfully and honestly conducted with considerations to reach out to the affected residents.

We urge you to consider to:

- Immediately stop any application and funding processes for the design and construction of this cemetery until a thorough communication with local communities is conducted and an acceptable agreement by all parties is reached.
- Set up committee to search for a suitable alternative site for the State Veterans Cemetery in the Orange County. We would love to help you in this search in many possible ways since we do want our veterans to have a good place to rest in peace.

We have collected over one thousand residents' signatures. Attached is one sample page. We reserve all our legal rights to make sure our voice being heard and our rights being protected.
